YEARS  
of  
Farm Equipment  
SERVICE  
to the Farmer

**Special Orchard  
LOW-ANGLE Sprinklers —**

Assure Most Efficient Application of Water.

# RAIN *Fastest, Positive Self-Locking* COUPLER.

## *Ideal for Orchard Operation*

### SAVES TIME

The photographs on this page show how quickly and easily the WADE'RAIN Laterals are guided into Locking Position with the aid of the NEW GUARD APRON, which also keeps dirt and grass from getting into the COUPLER.

### SAVES WALKING

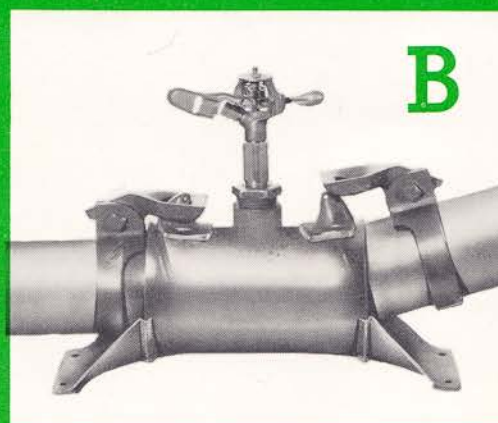

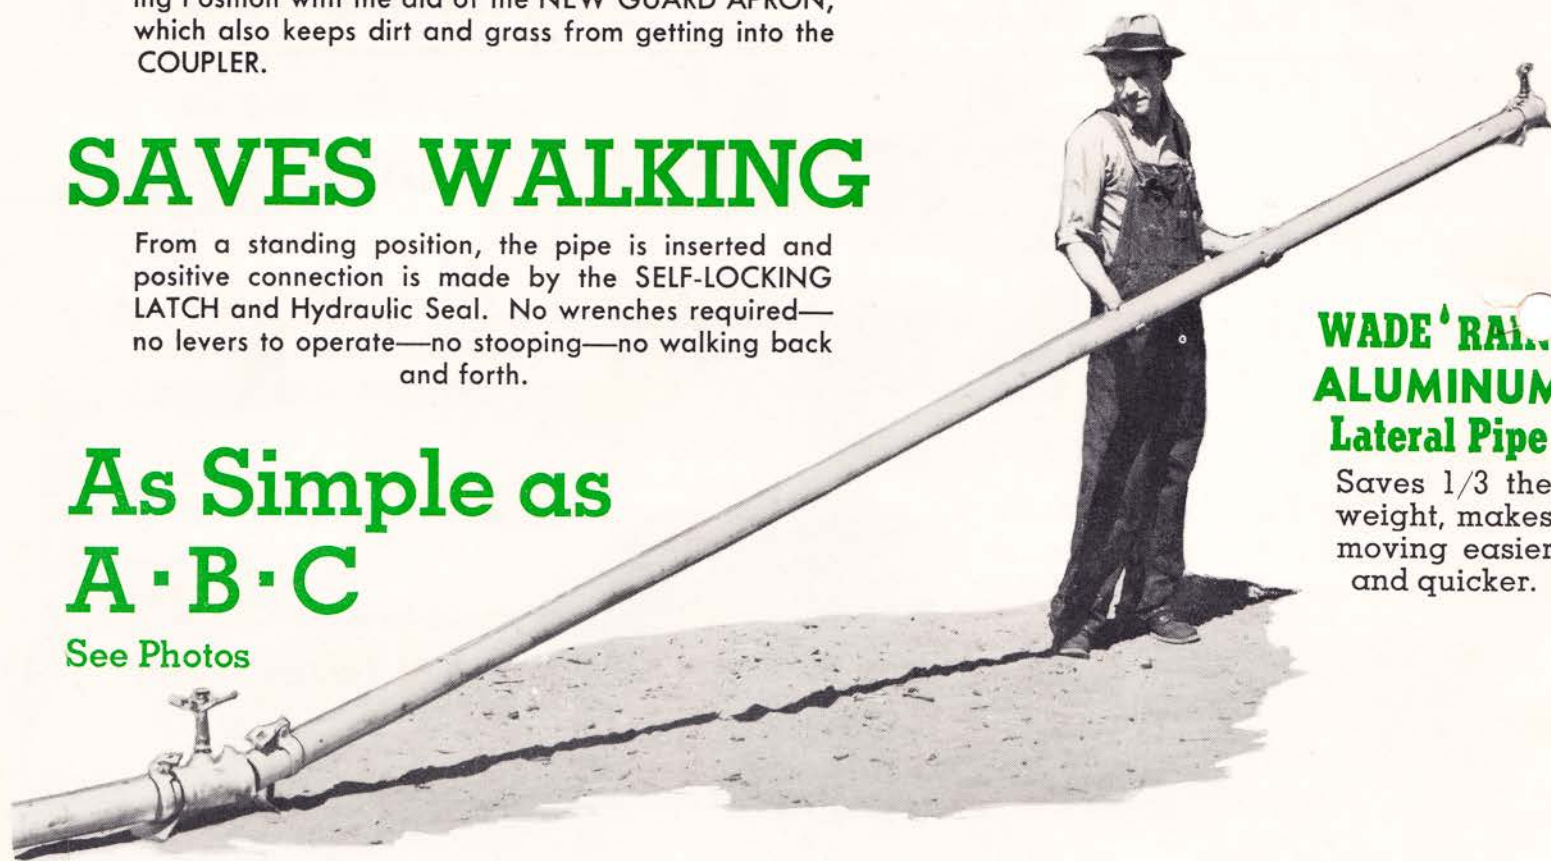

From a standing position, the pipe is inserted and positive connection is made by the SELF-LOCKING LATCH and Hydraulic Seal. No wrenches required—no levers to operate—no stooping—no walking back and forth.

### As Simple as A·B·C

**WADE'RAIN  
ALUMINUM  
Lateral Pipe**

Saves 1/3 the weight, makes moving easier and quicker.

# WADE'RAIN

Brings  
You All **12** ADVANTAGES!

**1**

**Saves up to  $\frac{2}{3}$  the water  
used in surface irrigation**

**2**

**BIG LABOR SAVING** — WADE'RAIN Orchard Sprinkler Irrigation, with special LOW-ANGLE Sprinklers and the famous WADE'RAIN Hydrant Valve saves miles of walking.

**3**

**No Soil Leaching or Washing** — Proper Design, by WADE'RAIN specialists in the field, gives correct water application to ALL of the orchard with no run-off.

**4**

**Lush Cover Crops Can Be Grown** — On steep Orchard Contours and shallow soils -- present installations are proof of this important fact.

5

**More Acres Irrigated** — Per Man Hour. Perfect control of water in Main Line with WADE'RAIN Hydrant Valves and Light-in-Weight ALUMINUM Pipes. Speeds Perfect Irrigation.

6

**Uniform Water Application** — with WADE'RAIN permits more complete availability of plant foods to the root system. Saves Commercial Fertilizers.

7

**Irrigates Roughest Land** — WADE'RAIN'S maximum quick Coupler flexibility, lightweight and positive Latch make hilly orchards easy to thoroughly irrigate.

8

**Complete Control of Water** — Precious, costly Public Irrigation water can be utilized most efficiently with the sure control of WADE'RAIN Hydrant Valves.

9

**No Rills or Ditches** — WADE'RAIN opens up the Orchard for smooth operation of other Orchard Machinery.

10

**Improves Tree Root Structure** — Complete Water Distribution encourages lateral root growth, thus taking food from more soil.

11

**Non-Productive Trees Bear Fruit** — on knolls where surface irrigation fails to provide sufficient moisture and where soils are porous.

12

**Minimum Water on the Tree Foliage**  
Is Assured by WADE'RAIN Equipped With Specially Designed LOW-ANGLE Sprinklers.

**"RAIN WHEN YOU WANT IT!"**

# Why Not Have All the Advantages of **The LEADER** IN ORCHARD SPRINKLER IRRIGATION!

## NO DITCHES

Keeps Land Free  
of Obstructions.  
Cultivating,  
Spraying and  
Harvesting  
Equipment  
Lasts Longer.

## NO LEACHING

WADE'RAIN  
Only Applies  
Water at a Rate  
Which the Soil  
Can Absorb.

## RETAINS...

Soil Moisture  
Longer by  
Controlled  
Precipitation  
Rate.

## SAVES WATER

WADE'RAIN uses  
ONE THIRD as much  
water as ditch  
irrigation.

Applies the water  
WHERE YOU  
WANT IT.
